

Re: Proposition 65 Warnings

This letter is intended to make you particularly aware of a new warning that we are adding to our Material Safety Data Sheets for essentially all of our products. The warning is required when any detectable amount, including trace quantities, of particular chemicals listed by the State of California as being carcinogens or reproductive toxins may be present in the product. The Safe Drinking Water and Toxic Enforcement Act of 1986 resulting from California's Proposition 65 requires among its major provisions that:

"No person in the course of doing business shall knowingly and intentionally expose any individual to a chemical known to the state to cause cancer or reproductive toxicity without first giving clear and reasonable warning to such individual" (California Health and Safety Code Section 25249.6)

We have recently received notification from various manufacturers of the individual ingredients being used to formulate our metalworking/treatment, etc. products that these basic ingredients contain detectable and/or trace amounts of the State-listed substances, usually as impurities or contaminants. We have also received notices from container suppliers that their metal and plastic containers may similarly contain detectable amounts of one or more State-listed substances.

In addition to any chemicals already listed as hazardous, Turco finished products may contain these basic ingredients which may or do contain the detectable or trace amounts of the State-listed substances. The type of warning shown on our MSDS sheets is therefore necessary. Copies of the applicable MSDS's are supplied to you as attachments to each bill of lading. Metalworking/treatment, etc. products, such as ours which are formulated with currently available ingredients containing trace or detectable quantities of the State-listed substances, are required under the law to bear the Proposition 65 warning.

It is recommended that you review The Safe Drinking Water and Enforcement Act carefully in order to determine if other obligations might exist for your company.

Very truly yours,

J. Hackett

SECTION III - PHYSICAL DATA:

SECTION III — PRIBLEME	DATA.	
BOILING POINT, *F:	Approx 105°F	SPECIFIC GRAVITY: 1.14
VAPOR PRESSURE (mmHg):	Approx 400mm	VOLATILE, % BY VOL: approx. 95%
		EVAPORATION RATE (Bu. Ac. = 1):
APPEARANCE AND ODOR: Pink to amber two	layer liquid, phenolic odos	SOLUBILITY IN WATER: Appreciable SOLUBILITY IN WATER: Appreciable SPH 3 Froin H O 8-10 And Product may contain to any chemicals listed as name of the contain detectable (trans). The contain detectable (trans).
SECTION IV - FIRE AND	EXPLOSION HAZARDS: SERVE	his produce may contain detectable listed as have
FLASH POINT AND METHOD U	SED: (CALIFIC	July described to the detectors listed
None to boil (Setaf:	lash)	the general to any chemicals listed as have also as have a supply of the state of t

contain datectable (trem) quantities

SECTION IV - FIRE AND EXPLOSION HAZARDS:

EXTINGUISHING MEDIA:

-anthune lo cause Carbon dioxide, foam, water fog
special fire Fighting PROCEDURE AND PRECAUTIONS: Use self-contained respiratory protection. Any water runoff may contain hexavalent chrome and should not be allowed to enter sewer or waterways.

unusual fire and explosion Hazards: Thermal decomposition may produce toxic oxides of carbon and/or chlorine. Drums exposed to 100°F and above may develop sufficient internal pressure to rupture.

SECTION V - HEALTH, EMERGENCY AND FIRST AID INFORMATION:

EFFECTS OF OVER EXPOSURE: EYES:

Moderate to severe irritation.

Liquid: Severe damage, may cause blindness

SKIN: Chemical burns, possible necrosis, defatting. May be absorbed through skin in toxic amounts Chromates are skin sensitizers.

Dizziness, headache, intoxication. Inhalation of mist of chromate-containing materials INHALATION: may cause permanent damage to upper respiratory tract, and may cause lung cancer risk.

Severe irritation to gastrointestinal tract, may be harmful or fatal if swallowed. INGESTION: Toxic effects may not appear immediately.

MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED: Metabolism of methylene chloride to carbon monoxide may lead to accumulation of dangerous levels of carboxyhemoglopin which may not be tolerated by persons with impaired cardio-pulmonary function. This may be aggravated by smoking.

N-191B

FIRST AID: EYES: Flush eyes with large volumes of water for at least 15 minutes. Obtain medical
attention.
SKIN: Flush affected area with clean cool water. Wash with soap and water. Rinse thoroughly, If
irritation persists or blistering occurs, obtain medical attention.
Remove to fresh air. If breathing is difficult, administer oxygen. If breathing has
stopped, apply artificial respiration. Obtain medical attention.
INGESTION: Do not induce vomiting except on advice of qualified medical personnel. If victim is
conscious, dilute by giving large volumes of milk or water. Obtain immediate medical attention. Never attempt to induce vomiting or give anything by mouth to an unconscious person.
PRIMARY ROUTES OF ENTRY: INHALATION X SKIN CONTACT X OTHER
SECTION VI — REACTIVITY DATE:
STABILITY: STABLE X UNSTABLE HAZARDOUS POLYMERIZATION WILL NOT OCCUR
CONDITIONS TO AVOID:
Contact with strong acids, strong oxidizing agents, open flame HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, carbon dioxide, phosgene, acid gases, other toxic volatile organic compounds
Votatile of gaine compounds.
SECTION VII — SPILL, LEAK AND DISPOSAL PROCEDURE:
SPILL OR RELEASE PROCEDURE: CONCENTRATE: Contain spillage. Stop leak at source, if this can be done safely. Ventilate area. Evacuate nonessential personnel. Pump liquid into DOT-approved drums for disposal. Absorb remaining liquid with inert material and place in DOT-approved drums. Wash area with water. Collect washing and place in DOT-approved drums. Keep concentrate and wash water from entering sewer or waterways.
USE SOLUTION:
Not applicable. This product is used as received.
OISPOSAL INFORMATION: CONCENTRATE: (1) Transfer to reclaiming center for recycling or solvent recovery. (2) Transfer to licensed hazardous waste treatment or disposal site for disposition under applicable local, state and regional regulations as hazardous waste.
SPENT SOLUTION AND RINSES: Dispose per (1) and (2) above. Treat rinse water as hazardous waste.
Remove chromate by reduction and precipitation. Remove organics by oxidation and carbon treatment. Clarified rinse water may be released to sewer if local regulations permit.
ECTION VIII — SPECIAL PROTECTION INFORMATION:
RESPIRATORY PROTECTION: If TLV is exceeded, a NIOSH-approved self-contained breathing apparatus, positive pressure hose mask
or air line mask is advised. These should have a full face piece and be operated in a positive pressure mode. Because of the short breakthrough time of methylene chloride and its poor warning properties, organic vapor cartridges or canisters are not recommended. If respirators are used, a formal training and screening program must be initiated. See 29 CFR 1910-134.
VENTILATION: Maintain sufficient mechanical ventilation to keep concentration below TLV.
PROTECTIVE EQUIPMENT: CHEMICAL FACE SHIELD OR GOGGLES: X GLOVES X BOOTS X APRON X PROTECTIVE SUIT IF required to avoid prolonged or repeated skin confact.
Immediately remove contaminated clothing. Launder separately before reuse. Discard shoes that become contaminated on the interior.
ECTION IX — OTHER INFORMATION:
SPECIAL PRECAUTIONS — STORAGE AND HANDLING: Store in cool area protected from exposure to direct sunlight, rain or standing water. Use care in opening containers to avoid spurting. CAUTION: Vapors from this product are heavier than air and will travel along the ground to collect in low lying areas, such as sumps. Personnel entering such areas must be provided with respiratory protection and a safety line. They should be kept under observation while in the area by another mon at a safe distance. Persons wearing contact lenses should wear vapor-proof well-fitting goggles. NOTE: (1) Methylene chloride has been found to cause an increase in some types of cancer and benign tumors in certain strains of some mammalian species. NOTE: (2) Do not use 1,1,1, trichloroethane, methylene chloride, perchloroethylene, or other halogenated solvents or solvent mixture containing solvents with pressurizable fluid handling equipment such as airless spray equipment containing aluminum or galvanized wetted

REPAIR AND MAINTENANCE OF CONTAMINATED EQUIPMENT: Relieve pressure. Cover openings to avoid spurting. Clean exterior and interior by flushing with water or solvent. Collect flushing for disposal. Use protective equipment for eyes, skin and inhalo-
